

SIZE CHARTS

The following page contains information on how to take the most accurate measurements, and convert them to correct sizing of MotorClothes® items. Also included are Recommended Sizing Mixes to help you balance your inventory sizes appropriately. Refer to these tools when planning your MotorClothes® apparel order to ensure a well-balanced mix of sizes in your assortment.

HOW TO MEASURE CORRECTLY

For the most accurate measurements, have someone else do the measuring, stand tall, yet relaxed and let the arms hang down at the sides. Keep the tape measure snug against the body and the tape measure parallel to the ground. Measurements are to be used as general guidelines for the corresponding sizes.

- **Caps:** Measure the head, just above the ears and eyebrows or where you want the cap band to sit.
- **Chest & Bust:** For jackets and vests, be sure to measure over a shirt or light sweater for the most accurate reading. Measure just under the arms and across the chest at the fullest point of the chest.
- **Waist:** Measure loosely around the waist at the preferred height of the waistband, at the natural waist for most fits or slightly lower for the low-rise and boot cut. If measuring for chaps, measure over a pair of pants or jeans for correct sizing.
- **Inseam:** Measure along the inner leg from the crotch to the sole of the shoe and boot.
- **Hip:** Simply measure all the way around the body at the broadest part of the hips (usually approximately 4 inches below the waist).
- **Gloves:** Wrap a tape measure around the fullest part of the hand, excluding the thumb. Be sure to measure each hand separately, and use the largest measurement for sizing.
- **Helmets:** Position a standard tape measure approximately one inch above the eyebrows. Be sure to begin measuring from zero. The tape measure will indicate the size of helmet the customer should start with. If the measurement falls between two sizes, have them try the larger size first.

Belts

To determine your belt size, measure around your body at the location the belt will be worn.

Belts: Measured from buckle to center hole

Straps: Measured from folded buckle edge to center hole.

Men's Belt Sizing

Men's Belts: All unisex and men's belts are true to pant sizing. For example, a size 32 waist would wear a size 32 belt.

Women's Belt Sizing

Belt Size	Actual Belt Measurement	
	inches	cm
2XS	28"	71cm
XS	31"	78.75cm
S	33"	83.82cm
M	35"	88.9cm
L	38"	96.5cm
XL	41"	104cm
1W	45"	114.3cm
2W	49"	124.5cm
3W	53"	134.6cm

Women's Missy Sizes

Women's tall sizes for jackets and tops are 1 1/2" longer in sleeve length and body length. **Women's petite** sizes for jackets and tops are 1 1/2" shorter in sleeve length and body length. **Sleeve length** is measured from center back of the neck.

Use this sizing chart as a guideline in determining your helmet size. To measure correct helmet size, measure around the head, one inch above the eyebrows and match inch measurement to chart. If between sizes, it is suggested to go with the smaller size. The interior padding of your helmet will loosen and form to the shape of your head the longer it is worn. A helmet that is loose when new will get even looser once broken in. The final sizing decision will be that of the customer.
